### **Clinic Offering New Value Emphasizing “Speed & Comfort” “Nihonbashi Muromachi Mitsui Tower Midtown Clinic” Opens**

“Nihonbashi Muromachi Mitsui Tower Midtown Clinic,” for which Advanced Medical Care Inc. (Minato-ku, Tokyo), a member of the Resorttrust Group, provides operational support, will open as described below.

The clinic will start offering outpatient care (internal medicine) on Monday, April 13, 2020 and comprehensive health screening programs and checkups on Monday, May 18, 2020 and has already started taking reservations for comprehensive health screening programs and checkups.

The clinic will occupy a floor space of about 600 tsubo (approx. 1,980 square meters) on the seventh floor of Nihonbashi Muromachi Mitsui Tower\*, which is conveniently located with direct access to Mitsukoshimae Station on the Tokyo Metro subway lines and easy access via several train services.

\*Flagship large-scale building complex symbolizing the second phase of the Nihonbashi Revitalization Plan promoted by Mitsui Fudosan Co., Ltd.

The clinic aims to offer “a speedy and comfortable space for checkups.” Thanks to the introduction of IoT, one can make a reservation, complete a medical questionnaire, and review one’s medical results online. (Reviewing service will start in the summer, 2020) Through system linkage, a seamless same-day series of checkup services will be offered from reception through to leaving the clinic. A guidance support system is introduced that grasps the situation of the number of patients waiting to receive examinations and efficiently navigates them to minimize the waiting time for each checkup. Examination rooms have separate zones for men and women (except for certain examinations) to ensure a relaxed ambience for patients. Communication in English is available for the convenience of patients whose native language is English. “Concierge” staff, all of whom have received customer-service training, will assist patients. With this outstanding level of service, patients are assured of a comfortable, stress-free venue where they can focus on their health.

In addition, the clinic is equipped with high-precision examination equipment such as a 3.0 Tesla

MRI system and endoscopes. Experienced staff are available to conduct a wide range of examinations. The clinic also offers outpatient care (internal medicine) for comprehensive medical support from examination through to follow-up and treatment.

Capitalizing on the track record and expertise in preventive medicine cultivated at clinics affiliated with the Group and mindful of needs in the era of longevity, the new clinic will offer advice to patients on how best to achieve healthy longevity, “living life to the full without relying on nursing care.”

Advanced Medical Care Inc. provides operational support to medical facilities, including “Tokyo Midtown Clinic” that opened in Roppongi, Tokyo, in 2007. Tokyo Midtown Clinic is the first medical facility in Japan offering outpatient care and checkups to obtain the JCI\* accreditation (ambulatory care), a global accreditation for health care services, for offering medical care under the concept of “offering patient safety and hospitality of a global standard.” Based on this cultivated expertise, “Nihonbashi Muromachi Mitsui Tower Midtown Clinic” will open in the heart of Nihonbashi, an area where many pharmaceutical companies are concentrated and that continues to evolve as a life sciences hub. Leveraging the service quality of the Resorttrust Group in hotel and restaurant operations and medical operations, “Nihonbashi Muromachi Mitsui Tower Midtown Clinic” will offer medical services with a keen eye on outstanding hospitality.

\*JCI is the abbreviation of Joint Commission International, a nonprofit organization established in 1994 as an international wing of The Joint Commission, which is an accrediting body for health care institutions in the United States. JCI provides education and consulting services as well as evaluation services for international accreditation and certification to achieve ongoing improvement of the safety and quality of care in the international community.

The Resorttrust Group has been expanding its hotel and restaurant business, the medical business, the senior lifestyle business, and the golf club business mainly through its membership business. In the medical business, the Group operates membership-based comprehensive medical support clubs offering high-precision medical examination services and provides operational support for various medical facilities. The membership-based comprehensive medical support club “HIMEDIC Tokyo Nihonbashi Course” will open in June 2020 on the same floor as “Nihonbashi Muromachi Mitsui Tower Midtown Clinic” and the Group will offer high-quality medical services to members of the Group’s services.

## ■ Overview of the medical corporation and the company providing operational support

### • About Midtown Clinic Medical Corporation

After first opening Tokyo Midtown Clinic in Roppongi, Tokyo in 2007, Midtown Clinic has been operating seven medical facilities mostly in Tokyo (as of February 2020), and the “Nihonbashi Muromachi Mitsui Tower Midtown Clinic” will be its eighth medical facility. Tokyo Midtown Clinic obtained an accreditation (ambulatory care) by Joint Commission International (JCI), a global accreditor for health care services, in January 2015. It was the first clinic in Japan offering outpatient care as well as checkups and comprehensive medical screening programs to be accredited by JCI. Based on the concept of “offering medical services and hospitality of a global standard,” Midtown Clinic Medical Corporation helps people maintain their health.
