Resorttrust Group & Mitsubishi Corporation Bring Japan’s Secret to Longevity to the World

Official Launch of Noage International

Official Website Opens for Pioneering Medical Tourism Business

Noage International Inc. (hereinafter, “Noage International”, the “Company”), a joint venture established on January 23, 2025 by Advanced Medical Care Inc. (hereinafter, “AMC”), a Group company of Resorttrust, Inc. (hereinafter, “Resorttrust”), and Mitsubishi Corporation (hereinafter, “MC”), officially began providing progressive medical services to the world with a view to achieving a truly healthy, long-lived society.

With this official launch, the Company opened an official website (<https://en.no-age.com/>) on April 7, 2025 to deliver the Company’s philosophy, services, and partnership information to as many people as possible.

■ Establishment background and purpose

Bringing the secrets of Japanese longevity to the world through progressive medical tourism

With more and more people living to be 100 and older, living healthily while preventing diseases and discovering them early is becoming increasingly important. In such an environment, Japan’s medical care has built worldclass longevity by harnessing early detection through precise medical checkups and preventative medicine based on scientific evidence. Noage International is a joint venture established to deliver medical and wellness value cultivated in Japan to realize healthy longevity regardless of age.

With joint investment by AMC, whose strength is in medicine, and MC, which has a global network, the Company represents a new challenge that combines medical technology and international development capability that are the pride of Japan. Through medical tourism originating in Japan, the Company aim not simply to provide medical services, but also to create a society that connects people together by transcending age and

national borders and to realize a future where everyone can live healthily in body and mind.

■ Service profile

True wellbeing achieved through high-precision medical exams and longevity care services

The services started in April 2025. A medical experience is provided that is not readily obtainable in other countries by supplying Japan's distinctive progressive medicine based on safety, peace of mind, and trust. Through partnerships with clinics that have advanced technologies and ample track records, the Company will generate synergies between early detection and early treatment as it aims for a truly healthy, long-lived society.

The services offered by the company is underpinned by the medical exam track record built up by the Resorttrust Group, which boasts high precision above national averages, 2.98% for the first-time cancer detection rate and an average of 1.23% even for continuing patients. With a team of specialist physicians who conduct precise radiographic readings and a system that consistently incorporates the latest exam equipment, minute cancers and other abnormalities that have been overlooked in the past are detected with high precision. Such high-quality medical exams and medical services support the program provided by the Company.

▼High-precision medical exams

The Company provides medical exam services that identify disease with a high level of precision before symptoms occur.

PET/CT, MRCP exams focusing on pancreatic cancer, genetic exams, and precision screening exams not normally conducted overseas—a multifaceted course is provided in line with the needs of each patient.

▼Longevity care services

The Company provides next-generation medical services aimed at preventing diseases associated with aging and raising body-mind functioning.

Stem cell therapy

Using stem cells, which encourage tissue repair and regeneration, treatment is provided for arteriosclerosis, arthralgia, and frailty.

- Excellent cell freshness, high quality management based on over 10 years of experience in regenerative medicine
- Medical alliance with The University of Tokyo Hospital Department of Orthopedics
- Individual medical team system that provides continued follow-up on progression after treatment
- Commitment to not freezing stem cells but rather using them in a fresh state

Blood purification therapy (apheresis)

Preventative medicine is provided by directly removing from the blood LDL cholesterol, neutral fat, inflammatory substances, viruses and toxins, which are linked directly to lifestyle-related diseases and disease risk.

- Prevent arteriosclerosis by directly removing bad substances
- Suppress blood clots and plaque
- Improve vascular endothelial function and blood flow

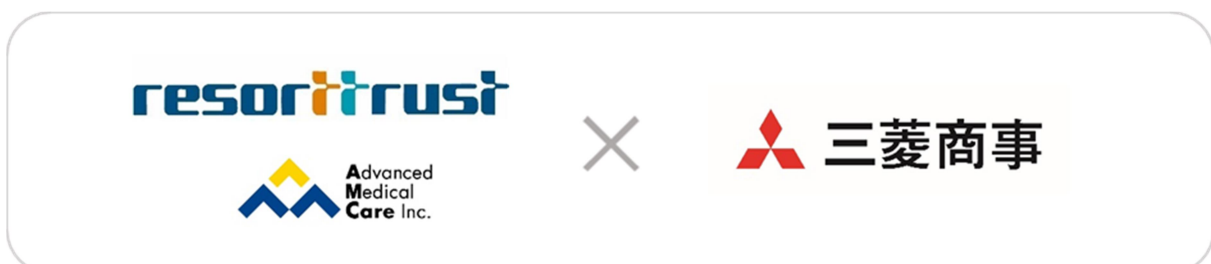

■ Comprehensive capabilities through Group coordination

The Company is a joint venture of AMC, a member of the Resorttrust Group, and MC.

Resorttrust and AMC have a high level of expertise in the medical field and possess an extensive track record in deploying progressive medical technologies, namely cancer treatment, immunotherapy, and regenerative medicine, and support for the management of medical exam facilities. In addition, by drawing on the hospitality cultivated by Resorttrust through its upscale membership program, the Company can provide a medical environment that is comfortable and reassuring.

The strength of these medical services in Japan will be spurred by adding MC's global network, solutions for medical institutions, and ability to promote digital transformation (DX), boosting alliances with overseas partners and a platform for international development.

By pooling the companies' respective expertise and resources, the Company aims to create new value in the medical tourism field.

■ Future development

While promoting the expansion of a global network in the medical and wellness fields, the Company is aiming to provide high-quality healthcare to as many people as possible.

The following initiatives are being conducted centering on Asia.

▼Project launch in Vietnam

Coordinating with local medical institutions and the government, development began on a center for medical tourism. The facility has already attracted the needs of several hundred people and full-fledged preparations are underway to provide services.

▼Development of new overseas sites and partners

By deepening partnerships with local medical institutions and facilities, the Company is strengthening its system for accepting international patients.

Drawing on medical technologies and hospitality that are the pride of Japan, Noage International is collaborating with partners in Japan and overseas and moving forward toward the realization of healthy longevity regardless of age.
