Announcement of Membership Sales Launch
for Grand HIMEDIC Club “HIMEDIC Kyoto University Hospital”

HIMEDIC, Inc., a wholly-owned subsidiary of Resorttrust, Inc. (“the Company”) operates the “Grand HIMEDIC Club,” a comprehensive medical support club that provides services such as highly accurate medical examinations and medical consultations together with partner medical institutions. This is to announce that application for memberships of “HIMEDIC Kyoto University Hospital Course” with its medical examination facility at “HIMEDIC Ward,” which is under construction in Kyoto University Hospital premises, will start on January 25, 2016. Medical examinations are scheduled to start in June 2016.

In the “HIMEDIC Kyoto University Hospital Course,” HIMEDIC, Inc. will commission medical examinations for Grand HIMEDIC Club members to Midtown Clinic Medical Corporation, and medical examination services will be provided at “Preemptive Medicine and Lifestyle Disease Research Center” in the “HIMEDIC Ward,” through joint research by Midtown Clinic Medical Corporation and Kyoto University.

The “Preemptive Medicine and Lifestyle Disease Research Center” will offer high-quality medical examinations based on a wealth of screening information in collaboration with medical specialists of Department of Diagnostic Imaging and Nuclear Medicine, Department of Diabetes, Endocrinology and Nutrition, Department of Cardiovascular Medicine, Department of Gastroenterology and Hepatology, Department of Breast Surgery, and Department of Obstetrics and Gynecology of Kyoto University Hospital. With a motto of “offering medical examinations with the quality of specialized outpatient care,” the Research Center will conduct diagnostic imaging using high-sensitive imaging technologies such as PET/CT scanner, breast PET scanner and MRI scanner as well as technologies for measuring bodily functions, highly accurate diagnosis using endoscopy equipped with NBI*, and multifaceted screening for a wide range of lifestyle diseases including diabetes, obesity, dyslipidemia, hypertension and osteoporosis.

* Endoscopy equipped with a Narrow Band Imaging (NBI) function in addition to normal light observation. The NBI creates enhanced images of capillaries in the surface layers of mucous membranes, which supply nutrients to cancer, and minute patterns on mucous membranes, based on coloration differences.

“Grand HIMEDIC Club” is a “comprehensive medical support club” that offers a wide range of support services in addition to medical examinations, based on accumulated medical examination data on members,

including references to medical institutions in the event that a disease is discovered, follow-up dietary and exercise guidance by medical concierges with nursing qualifications, and health consultation services from the “Club Doctors.” There are six medical examination locations, including HIMEDIC Yamanakako, HIMEDIC Osaka, HIMEDIC·Tokyo University Hospital, HIMEDIC·Midtown, HIMEDIC Tokyo Bay Imaging Center and HIMEDIC Tokyo Bay. The Company also plans to establish HIMEDIC Nagoya in summer 2016 following the opening of HIMEDIC Kyoto University Hospital in spring 2016.

HIMEDIC Kyoto University Hospital will solicit approximately 4,200 members. Furthermore, the Company expects the total value of all HIMEDIC contracts to be approximately ¥4.7 billion in the fiscal year ending March 2016.
